PROFILE

Aspiring Software Engineer with a strong background in backend development, full-stack web applications, and microservices architecture. Skilled in Java, Spring Boot, React, Python, MySQL, and RESTful API development. Experienced in developing scalable applications with secure authentication systems using Spring Security and JWT. Basic knowledge of machine learning model training, including data preprocessing, model building, and evaluation. Passionate about software engineering, problem-solving, and building innovative solutions using modern technologies and AI-powered systems.

PROJECTS

Moodlyze – AI-Based Emotion Detection and Task Analysis System

 [Backend](#)  [Frontend](#)  [Config](#)

- Developed a full-stack AI-powered emotion detection and task analysis system using React, Spring Boot microservices, Python, and MySQL.
- Built a microservices-based backend architecture with independently managed services and databases.
- Implemented secure authentication and authorization using Spring Security and JWT.
- Integrated a Python-based machine learning service for emotion detection and intelligent task analysis.
- Developed RESTful APIs and service-to-service communication for scalable backend operations.
- Designed responsive and user-friendly frontend interfaces using React.js.

Car Rental System – Backend Development [Source Code](#)

- Developed a secure backend system for a car rental service using Spring Boot, Java, Maven, and MySQL.
- Implemented JWT-based authentication and authorization for secure access control.
- Developed functionalities for vehicle management, booking management, and driver information handling.
- Integrated MySQL database management for efficient data storage and retrieval.

PahanaEdu – Bookshop POS Web Application [Source Code](#)

- Developed a full-stack Point of Sale (POS) web application using Java, JSP, Servlets, Maven, and MySQL.
- Implemented customer management, inventory management, billing, and sales transaction functionalities.
- Developed secure backend operations and integrated database functionalities for managing books, customers, and purchase records.
- Applied layered architecture concepts using DTO, DAO, Service, and Mapper layers to improve maintainability and scalability.
- Integrated bill generation and transaction processing with seamless frontend-backend communication.

- Followed Maven-based project structure and software engineering best practices.

City Cab – Cab Booking Web Application [Source Code](#)

- Developed a cab booking web application using Java, JSP, Servlets, Maven, and MySQL.
- Implemented booking management and frontend-backend integration functionalities.
- Applied layered architecture principles and Maven project structure for maintainable development.
- Managed database operations for customer and booking information.

Simple POS System – Backend Development [Source Code](#)

- Developed a backend Point of Sale (POS) system using Spring Framework, Java, and MySQL.
- Implemented inventory management and sales transaction functionalities.
- Developed RESTful APIs and integrated database operations for business processes.
- Applied layered architecture concepts and backend development best practices.

Ceylon Spice Restaurant – Website Development [Source Code](#)

- Developed a responsive restaurant website using PHP, HTML, CSS, and JavaScript.
- Implemented online table reservation functionality and customer interaction features.
- Designed user-friendly frontend interfaces for menu browsing and reservation management.
- Collaborated in a team environment using Git and version control practices.

EDUCATION

- 2025 – 2026 **BSc (Hons) in Software Engineering**
Cardiff Metropolitan University – ICBT Campus, Colombo, Sri Lanka
- 2022 – 2024 **Higher Diploma in Computing and Software Engineering**
Cardiff Metropolitan University – ICBT Campus, Colombo, Sri Lanka

TECHNICAL SKILLS

Programming Languages	Java, Python, JavaScript, PHP
Frontend Development	React.js, HTML, CSS, JavaScript
Backend Development	Spring Boot, Spring Security, JSP, Servlet, REST API Development
Database Management	MySQL
Tools & Technologies	Git, GitHub, Maven, Postman
Architecture	Microservices Architecture, Layered Architecture
Other Skills	Problem Solving, Team Collaboration, Debugging

LANGUAGE COMPETENCIES

- English: Fluent (Speaking, Reading, Writing)
- Sinhala: Native Language
