INTERN - SOFTWARE ENGINEERING

Programming | Debugging | Algorithms | Collaboration | Problem-Solving | Version Control | Code Optimization | Software Development Lifecycle

Aspiring Software Engineer with a strong background in programming, web development, and software solutions. Experienced in full-stack development and database management, with proficiency in **Java, PHP, JavaScript, HTML, CSS, and MySQL**. Skilled in utilizing frameworks like **Spring Boot and React** to build efficient and scalable applications. Adept at problem-solving, collaborating within teams, and leading projects to successful completion. Passionate about crafting innovative solutions that enhance user experiences and drive technological advancements. Seeking an internship opportunity to apply my skills, expand my knowledge, and contribute meaningfully to impactful projects.

EDUCATION

Cardiff Metropolitan University: ICBT Campus – Colombo, Sri Lanka

Higher Diploma in Computing and Software Engineering, Nov 2022 – July 2024

PROJECTS

Car Rental System – Backend Development

- Individual Project | Spring Boot | Java | Maven | MySQL
- Designed and developed a secure and efficient backend system for a car rental service using **Spring Boot and Java**. The system enables seamless car bookings, manages vehicle and driver information, and **ensures secure authentication and authorization with JWT tokens**. Integrated MySQL for database management, ensuring efficient data storage and retrieval.

Ceylon Spice Restaurant – Website Development

- Team Project | PHP | HTML | CSS | JavaScript
- Developed a fully functional restaurant website as part of a team, enabling seamless online table reservations. The website provides an intuitive user experience for customers to browse the menu, make reservations, and access restaurant details.

Simple POS System – Backend Development

- Individual Project | Spring Framework | Java | MySQL
- Developed a backend-only Point of Sale (POS) system using Spring Framework and Java for learning purposes. The system manages sales transactions and inventory, focusing on server-side functionality, API development, and MySQL database integration

City Cab JSP Servlet Project – Web Application Development

- *Individual Project | Java | Web Servlet | JSP | MySQL | Maven*
- Developed a cab booking web application using pure Java, Web Servlet, and JSP. The system allows users to easily book a cab, manage bookings, and interact with the frontend, all integrated with a MySQL database. The project follows a Maven-based structure for efficient

PROGRAMMING LANGUAGES

- Java (Proficient)
- PHP
- JavaScript
- Node.js (Currently Learning)

FRAMEWORK & TOOLS

- Spring Boot (Proficient)
- React.js (Currently Learning)
- JSP / Servlet
- Git & GitHub
- MySQL

SKILLS

- Experience with database management and creating scalable systems.
- Skilled in project planning, leadership, and team collaboration.
- Proficient in using Microsoft Office Suite and managing tasks effectively.
- Fluent in English and Sinhala, with excellent communication and time-management skills.

LANGUAGE COMPETENCIES

- English: fluent (speaking, reading, writing)
- Sinhala: native language
